WORK
EXPERIENCE

Matrix42   December 2017 — Present

.Net Cloud Software Engineer

Working on MyWorkspace product (https://www.matrix42.com/en/myworkspace/), which is a virtual cloud workplace, available directly via browser and providing access to various data and applications. Working in a multinational distributed Scrum team. Implemented Build and Release management for one of the core solutions leading to increase in feature delivery speed and improved deployment flow. Participated in building a backup system utilizing Azure Functions, table and blob storage.

Key technologies: Microsoft Azure, ASP.Net, AngularJS, Microsoft Extensibility Framework, VSTS.

Infopulse   September 2016 — December 2017

Junior Software Engineer (.Net)

Automation of documents generation in Docx and PDF formats based on custom document template for an invoicing system developed for one of the European country's governmental agencies, implemented integration with MS Dynamics CRM using CRM SDK to email invoices directly to clients registered in CRM.

Participated in development of multiple versions of a complex financial analysis solution for managers in an international telecommunication corporate group using a client-server architecture with the server written in ASP.NET WebAPI, consuming two MS SQL databases and using Excel documents generation with Excel Interop.
Developed multiple Sharepoint and ASP.Net MVC based solutions with front-end created using AngularJS/Angular2(4) and Bootstrap.

Terrasoft   May 2016 — September 2016

Junior Software Engineer (C#/JavaScript)

Working with various projects based on company's own CRM platform Bpmonline, implementing different features requested by customers from European countries. Developed custom business processes, additional interface features and custom report generation.

Concepter

Windows Phone developer

As a Bachelors graduation work created Windows Phone application targeting devices on Windows Phone 8.1+ for Iblazr flash device. App implements working with devices' both cameras(main and front), photo and video capture, BLE support, ability to connect multiple Iblazr devices and adjust settings for each of them(flash power and light temperature).

Concepter
